EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leong Lei on June 19, 2006.

The application has been amended as follows:

Claim 4, line 15; Change "position. In" to "position, and in".

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a clipping device as set forth in the instant claims having a base frame connected to an electrode plate having a plurality of pressing rollers eccentrically mounted to a first shaft in such a way that the edge of the roller pressed the base frame, and an operating rod having a board pressing section has a first end pivot mounted to the base frame so that a spring and linking rod module are positioned between the operating rod and a first shaft, and a second end of the pressed board pressing section, wherein the first shaft is rotated with an angle and the pressing roller is rotated to an angle so there is a gap formed between the roller edge and the base frame to insert the base plate and after releasing the board

pressing section of the operating rod, the spring restores the roller edge contact to the electroplating base plate to tightly clip the electroplating base plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
